

# Peering Policy

## **1 – Requirements.**

1. Routable ASN.
2. A Network Operations Centre, who are both operational and contactable 24x7x365.
3. All peering shall be settlement-free.
4. The requesting party must have a current and complete peeringdb.com entry.
5. The ability to exchange at least 1Gbit/s of IP traffic.
6. Once notified of a peering or traffic issue, the peer must escalate immediately to a NOC engineer and provide timely resolution in order to prevent any further peering issues.
7. The peer shall report any network maintenance issues that may affect our BGP session and traffic exchanges.
8. Neither Party shall establish a route of last resort directed towards the other Party's Network.
9. The peer must present the same route announcements on all sessions.

## **2 - Refusal.**

Innova Communications limited reserves the definite right to refuse peering with any party at any given time.

## **3 – Termination.**

Innova Communications Limited reserves the definite right to terminate any peering or agreements at any given time.

## **4 – Contact.**
